Professional Summary

Master's student in the final year of Data Science and Information Systems Security at Sultan Moulay Slimane University. Completed a two-month AI Engineering internship at SPORTScore SAS, working on LLM-based document processing, structured-output validation and model quantization. Practical experience in machine learning, generative AI, RAG and reinforcement learning.

Technical Skills

Generative AI: LLMs, RAG, prompt engineering, embeddings, OCR, document processing, JSON Schema, model quantization
Machine Learning: Machine Learning, Deep Learning, Reinforcement Learning (DQN, DDQN), feature engineering, model evaluation, TensorFlow, PyTorch, Scikit-learn
Data Science: Python, Pandas, NumPy, data analysis, regression, Power BI, SPSS
Databases: SQL, NoSQL, MongoDB
Cybersecurity: Network security, web application security, cryptography, IDS/IPS, Burp Suite, Kali Linux, Metasploit

Professional Experience

Aug 2026 – Oct 2026

AI Engineering Intern

SPORTScore SAS | Paris, France

- Contributed to a document-retrieval workflow combining OCR, parsing and vector indexing.
- Implemented structured-output validation using JSON Schema and constrained generation.
- Applied model quantization to improve LLM inference efficiency.
- Evaluated pipeline outputs and documented results with the AI team.

Education

Sep 2025 – Jul 2027 (expected)

Master's Degree in Data Science and Information Systems Security (in progress)

Sultan Moulay Slimane University, Polydisciplinary Faculty of Beni Mellal

Focus: data science, artificial intelligence, cybersecurity, and secure information systems.

2025

Bachelor's Degree in Data Science and Information Systems Security

Sultan Moulay Slimane University, Polydisciplinary Faculty of Beni Mellal

Relevant Coursework: Machine Learning · Feature Engineering · IoT · Information Systems Auditing · Cybersecurity · Python for Data Science.

2024

DEUG in Mathematics and Computer Science

Sultan Moulay Slimane University, Polydisciplinary Faculty of Beni Mellal

Relevant Coursework: Programming · Algorithms · Data Structures · Probability & Statistics · Operating Systems.

Professional Projects

2026

SOAR RL Agent

Collaborative reinforcement-learning project for security-alert triage in a simulated SOC: FastAPI backend, RL environment, reward system, DQN and DDQN agents, automated tests.
Technologies: Python, FastAPI, Reinforcement Learning, DQN, DDQN, SOAR, Docker Compose

2026

BachelorAI Tutor

RAG-based educational assistant providing answers grounded in academic course materials.
Technologies: Python, MongoDB, Ollama, RAG

2026

Islamic AI Chat

AI chat application providing answers grounded in trusted Islamic references, with authentication and prompt-injection checks.
Technologies: MongoDB, LLMs, JWT

Soft Skills

Analytical Thinking · Problem-Solving · Autonomy & Initiative · Rigor & Attention to Detail · Professionalism · Commitment & Diligence
