Oualid Ait Alla

Master's Student in Data Science & Information Systems Security

Beni Mellal, Morocco | Email: oualidaitalla18@gmail.com | Phone: +212 609 831 277 | Portfolio: https://oualid-ait-alla.vercel.app | LinkedIn: https://www.linkedin.com/in/aitalla-oualid-9797132bb/ | GitHub: https://github.com/gimuser

PROFESSIONAL SUMMARY

Master's student in Data Science and Information Systems Security with practical project experience in artificial intelligence, machine learning, generative AI, data analytics, and secure intelligent systems. Built academic and personal projects covering RAG assistants, protected AI chat, full-stack web applications, regression modeling, image classification, and cybersecurity labs. Seeking an internship opportunity to contribute to data-driven and secure software projects while continuing to grow through applied engineering work.

EDUCATION

Master's student in Data Science and Information Systems Security **2026**
Sultan Moulay Slimane University, Polydisciplinary Faculty of Beni Mellal
Graduate studies focused on data science, artificial intelligence, cybersecurity, and secure information systems.

Bachelor's in Data Science & Information Systems Security **2025**
Sultan Moulay Slimane University, Polydisciplinary Faculty of Beni Mellal
Coursework includes data science, AI, database systems, network security, cybersecurity, cryptography, machine learning fundamentals, information systems security, Python, SQL, C, and HTML5.

Undergraduate Diploma in Mathematics & Computer Science (DEUG) **2024**
Sultan Moulay Slimane University, Polydisciplinary Faculty of Beni Mellal
Coursework included linear algebra, calculus, probability and statistics, discrete mathematics, CMS, database fundamentals, algorithms, and computer systems.

High School Diploma, Mathematical Sciences **2023**
Al Massira, Azilal
Mathematics, physics, computer science basics, and statistics.

High School Diploma, Physical Sciences **2022**
Al Massira, Azilal
Mathematics, mechanics, electricity, and scientific fundamentals.

TECHNICAL SKILLS

Programming: Python, TypeScript, JavaScript, SQL, C, PHP, HTML5

Frontend: React, Vite, Next.js, Tailwind CSS, Responsive UI, Dark/light themes

Backend and APIs: Node.js, Express, Next.js API routes, REST APIs, JWT auth, HTTP-only cookies

Data Science: Data cleaning, Feature engineering, Exploratory data analysis, Regression modeling

Machine Learning & AI: Machine learning fundamentals, Artificial intelligence, PyTorch, Deep learning basics, Image classification

Generative AI and RAG: RAG, Embeddings, Vector search, Ollama, OpenAI, OpenRouter, Prompt guards, Document parsing

Mathematics for ML: Linear algebra, Calculus, Probability, Statistics, Discrete mathematics

Cybersecurity: Information systems security, Network security, Cryptography, Kali Linux, Metasploit, Helmet, CORS, Rate limiting, Zod validation

Databases & Information Systems: MongoDB, Mongoose, Prisma, SQLite, Database fundamentals, Information systems, Big data fundamentals

SELECTED PROJECTS

BachelorAI Tutor **2026**

I built a full-stack educational RAG assistant that helps bachelor/licence students ask questions based on their course documents, modules, and uploaded resources.

Technologies: TypeScript, React, Vite, Tailwind CSS, Node.js, Express, MongoDB, Mongoose, Ollama, RAG, Embeddings, Docker

- Student authentication with JWT HTTP-only cookies and bcrypt password hashing.
- Parse PDF, DOCX, TXT, and Markdown files, then chunk and embed the content for retrieval.
- Role checks, upload validation, rate limiting, Helmet, CORS, Zod validation, and safe HTML sanitization.

Links: https://github.com/gimuser/bachlor-ai-tutor

Islamic AI Chat **2026**

I built a protected full-stack AI chat application with authentication, conversation history, model selection, and safety-oriented prompt controls.

Technologies: TypeScript, React, Vite, Tailwind CSS, Node.js, Express, MongoDB, Mongoose, OpenAI, OpenRouter, Ollama, JWT

- Create a protected chat UI with registration, login, conversation history, and model selection.
- Support OpenAI, OpenRouter, and local Ollama providers.
- Helmet, CORS, rate limiting, request validation, and protected API routes.

Maison Global Store **2026**

I developed a secure affiliate commerce starter with authentication, product discovery, checkout extension points, multilingual labels, and local recommendations.

Technologies: Next.js, TypeScript, Tailwind CSS, Prisma, SQLite, Argon2id, Zod, Stripe, Docker

- Build a responsive storefront with product catalog, filtering, and affiliate outbound links.
- Prisma models for users, OAuth accounts, sessions, verification codes, products, events, orders, order items, and payment attempts.
- Used integer money fields, server-side Zod validation, hashed secrets, and provider extension points.

Car Price Prediction System **2025**

I worked on a machine-learning regression project to estimate car prices from structured vehicle data such as brand, year, mileage, and engine specifications.

Technologies: Python, Data cleaning, EDA, Feature engineering, Regression models

- Clean and prepare structured vehicle data for modeling.
- Perform exploratory data analysis and feature engineering.
- Train and evaluate regression models using Python libraries.

ACADEMIC AND PERSONAL PROJECT EXPERIENCE

Academic machine-learning project work **January 2025 - June 2025**

Beni Mellal, Morocco | 6 months

I completed these academic and personal projects as practical engineering work, not as employment experience.

- I built a car price prediction system using data cleaning, feature engineering, EDA, and regression model evaluation.
- I built and tested an image-classification model with PyTorch and labeled image datasets.

Cybersecurity learning project **March 2024 - May 2024**

Beni Mellal, Morocco | 3 months

I worked in a controlled, ethical security testing environment.

- I studied Android device security testing with Kali Linux and Metasploit and proposed mitigation techniques.

Web development project **March 2023 - June 2023**

Beni Mellal, Morocco | 4 months

I completed this academic information-system project to practice database-backed web development.

- I developed a PHP hotel management system with room management, reservations, user handling, and database persistence.
