Oualid Ait Alla

Master's Student in Data Science & Information Systems Security

Beni Mellal, Morocco | Email: oualidaitalla18@gmail.com | Phone: +212 609 831 277 | Portfolio: https://oualid-ait-alla.vercel.app | LinkedIn: https://www.linkedin.com/in/aitalla-oualid-9797132bb/ | GitHub: https://github.com/gimuser

PROFESSIONAL SUMMARY

Master's student in Data Science and Information Systems Security with hands-on academic and personal projects in AI, machine learning, generative AI, RAG, data analytics, data management, APIs, and secure intelligent systems. Built document-grounded assistants, an AI chat application with safeguards, full-stack applications, regression and image-classification workflows, and cybersecurity learning labs. Seeking an internship to contribute to data-driven products, automation, and secure software systems.

EDUCATION

Master's student in Data Science and Information Systems Security **Sep 2025 – Oct 2027 (expected)**
Sultan Moulay Slimane University, Polydisciplinary Faculty of Beni Mellal
Currently pursuing graduate studies focused on data science, artificial intelligence, cybersecurity, and secure information systems. Degree expected October 2027.

Bachelor's in Data Science & Information Systems Security **2025**
Sultan Moulay Slimane University, Polydisciplinary Faculty of Beni Mellal

Undergraduate Diploma in Mathematics & Computer Science (DEUG) **2024**
Sultan Moulay Slimane University, Polydisciplinary Faculty of Beni Mellal

High School Diploma, Mathematical Sciences **2023**
Al Massira, Azilal

High School Diploma, Physical Sciences **2022**
Al Massira, Azilal

TECHNICAL SKILLS

Generative AI and RAG: RAG, Embeddings, Vector search, Ollama, OpenAI, OpenRouter, Prompt guards, Document parsing

Machine Learning & AI: Machine learning fundamentals, Artificial intelligence, PyTorch, Deep learning basics, Image classification

Data Science & Analytics: Data analytics, Data cleaning, Data visualization, Feature engineering, Exploratory data analysis, Regression modeling

Data Management & Information Systems: MongoDB, Mongoose, Prisma, SQLite, Database fundamentals, Information systems, Big data fundamentals

Backend and APIs: Node.js, Express, Next.js API routes, REST APIs, JWT auth, HTTP-only cookies

Programming: Python, TypeScript, JavaScript, SQL, C, PHP, HTML5

Frontend: React, Vite, Next.js, Tailwind CSS, Responsive UI, Dark/light themes

Cybersecurity: Information systems security, Network security, Cryptography, Kali Linux, Metasploit, Helmet, CORS, Rate limiting, Zod validation

Mathematics for ML: Linear algebra, Calculus, Probability, Statistics, Discrete mathematics

SELECTED PROJECTS

SOAR RL Agent **2026**
Contributed to a collaborative SOAR reinforcement-learning project with a FastAPI backend, data pipeline, RL environment, reward system, SOC simulation, web interface, and automated tests.
Technologies: Python, FastAPI, TypeScript, Reinforcement Learning, SOAR, SOC simulation, Docker Compose, Automated testing

BachelorAI Tutor **2026**
Built a RAG educational assistant that indexes course and uploaded documents by semester and module, retrieves relevant sources, and returns course-grounded answers.
Technologies: TypeScript, React, Vite, Tailwind CSS, Node.js, Express, MongoDB, Mongoose, Ollama, RAG, Embeddings, Docker

Islamic AI Chat **2026**
Built a full-stack AI chat application with authentication, stored conversation history, configurable AI providers, and prompt-injection checks for a sensitive question-and-answering context.
Technologies: TypeScript, React, Vite, Tailwind CSS, Node.js, Express, MongoDB, Mongoose, OpenAI, OpenRouter, Ollama, JWT

Maison Global Store **2026**
Developed a secure affiliate-commerce starter with product discovery, authentication, local recommendations, checkout extension points, and server-side validation.
Technologies: Next.js, TypeScript, Tailwind CSS, Prisma, SQLite, Argon2id, Zod, Stripe, Docker

ACADEMIC AND PERSONAL PROJECTS

Academic Machine Learning Projects **January 2025 - June 2025**
Beni Mellal, Morocco | 6 months
Developed a car price prediction workflow using data cleaning, exploratory analysis, feature engineering, and regression-model evaluation.

Cybersecurity learning project **March 2024 - May 2024**
Beni Mellal, Morocco | 3 months
Studied Android device security testing with Kali Linux and Metasploit, then documented mitigation approaches.

Academic Web Development Project **March 2023 - June 2023**
Beni Mellal, Morocco | 4 months
Developed a PHP hotel management application supporting room management, reservations, user handling, and database persistence.
