PROFILE

Master's student in Data Science and Information Systems Security with hands-on project experience in artificial intelligence, machine learning, generative AI, data analytics, automation, and secure intelligent systems.

Developing practical skills in data science, Python development, machine learning, data visualization, cybersecurity, and full-stack software development through academic and personal projects.

Nationality: Moroccan | **Mobility:** Morocco, remote and hybrid opportunities

EDUCATION

Master's student in Data Science and Information Systems Security — **2026**

Sultan Moulay Slimane University, Polydisciplinary Faculty of Beni Mellal

Graduate studies focused on data science, artificial intelligence, cybersecurity, and secure information systems.

Bachelor's in Data Science & Information Systems Security — **2025**

Sultan Moulay Slimane University, Polydisciplinary Faculty of Beni Mellal

Coursework included data science, AI, database systems, network security, cybersecurity, cryptography, machine learning fundamentals, information systems security, Python, SQL, C, and HTML5.

Undergraduate Diploma in Mathematics & Computer Science (DEUG) — **2024**

Sultan Moulay Slimane University, Polydisciplinary Faculty of Beni Mellal

Coursework included linear algebra, calculus, probability and statistics, discrete mathematics, CMS, database fundamentals, algorithms, and computer systems.

High School Diploma, Mathematical Sciences — **2023**

Al Massira, Azilal

Mathematics, physics, computer science basics, and statistics.

High School Diploma, Physical Sciences — **2022**

Al Massira, Azilal

Mathematics, mechanics, electricity, and scientific fundamentals.

TECHNICAL SKILLS

Programming: Python, TypeScript, JavaScript, SQL, C, PHP, HTML5

Backend and APIs: Node.js, Express, Next.js API routes, REST APIs, JWT auth, HTTP-only cookies

Machine Learning & AI: Machine learning fundamentals, Artificial intelligence, PyTorch, Deep learning basics, Image classification

Mathematics for ML: Linear algebra, Calculus, Probability, Statistics, Discrete mathematics

Data Management & Information Systems: MongoDB, Mongoose, Prisma, SQLite, Database fundamentals, Information systems, Big data fundamentals

Frontend: React, Vite, Next.js, Tailwind CSS, Responsive UI, Dark/light themes

Data Science & Analytics: Data analytics, Data cleaning, Data visualization, Feature engineering, Exploratory data analysis, Regression modeling

Generative AI and RAG: RAG, Embeddings, Vector search, Ollama, OpenAI, OpenRouter, Prompt guards, Document parsing

Cybersecurity: Information systems security, Network security, Cryptography, Kali Linux, Metasploit, Helmet, CORS, Rate limiting, Zod validation

SELECTED PROJECTS

BachelorAI Tutor — **2026**

Built a full-stack educational RAG assistant that gives bachelor's students a conversational way to consult course material. The application ingests course and user-uploaded documents, retrieves relevant content by semester and module, and uses Ollama to produce answers grounded in the retrieved sources. It combines a React/Vite frontend, an Express API, MongoDB, embeddings, and a local vector store to make course information easier to access while limiting unsupported answers.

TypeScript, React, Vite, Tailwind CSS, Node.js, Express, MongoDB, Mongoose, Ollama, RAG, Embeddings, Docker

Islamic AI Chat — **2026**

Built a full-stack AI chat application for questions about Islam, with safeguards appropriate to a sensitive subject. The application combines a React/Vite frontend, an Express API, MongoDB conversation storage, configurable OpenAI, OpenRouter, and Ollama providers, and JWT authentication. It preserves conversation history and applies prompt-injection checks and safe HTML handling before responses are displayed.

TypeScript, React, Vite, Tailwind CSS, Node.js, Express, MongoDB, Mongoose, OpenAI, OpenRouter, Ollama, JWT

Maison Global Store — **2026**

Developed a secure affiliate-commerce starter for product discovery, authentication, local recommendations, and checkout extension points. Built with Next.js, TypeScript, Prisma, and SQLite, it validates server-side requests, uses Argon2id to protect passwords, and structures product, order, and session data. The project establishes a practical security and data-management foundation before live payment or affiliate integrations.

Next.js, TypeScript, Tailwind CSS, Prisma, SQLite, Argon2id, Zod, Stripe, Docker

Car Price Prediction System — **2025**

Developed a machine-learning regression workflow to estimate car prices from structured vehicle data, including brand, model, year, mileage, and engine specifications. Using Python, the project applies data cleaning, exploratory data analysis, feature engineering, and regression-model evaluation to prepare and model the data without unsupported performance claims.

Python, Data cleaning, EDA, Feature engineering, Regression models

ACADEMIC & PERSONAL PROJECTS

Academic Machine Learning Projects — **January 2025 - June 2025**

Beni Mellal, Morocco | 6 months

Completed as academic and personal engineering projects; this work is not presented as employment experience.

- Developed a car price prediction workflow using data cleaning, exploratory analysis, feature engineering, and regression-model evaluation.
- Built and tested an image-classification workflow with PyTorch and labeled image datasets.

Cybersecurity learning project — **March 2024 - May 2024**

Beni Mellal, Morocco | 3 months

Completed in a controlled, ethical security-testing environment.

- Studied Android device security testing with Kali Linux and Metasploit, then documented mitigation approaches.

Academic Web Development Project — **March 2023 - June 2023**

LANGUAGES

Arabic: Native
English: Intermediate
French: Intermediate
Spanish: Beginner

INTERESTS

Applied AI and generative AI prototyping
Cybersecurity labs and secure system design
Data visualization and business intelligence
Multilingual AI for Arabic, French, and English users

Beni Mellal, Morocco | 4 months

Completed to practise database-backed web development in an information-systems context.

- Developed a PHP hotel management application supporting room management, reservations, user handling, and database persistence.
