Oualid Ait Alla

Master's Student in Data Science & Information Systems Security

oualidaitalla18@gmail.com
Beni Mellal, Morocco
LinkedIn: [ADD LINKEDIN URL]
GitHub: [ADD GITHUB URL]

PROFILE

Master's student in Data Science and Information Systems Security, passionate about artificial intelligence, machine learning, generative AI, data analytics, automation, and secure intelligent systems.

I combine data science, Python development, machine learning fundamentals, data visualization thinking, cybersecurity awareness, and practical project-based learning.

EDUCATION

Current Master's student in Data Science and Information Systems Security
Sultan Moulay Slimane University, Morocco
Current profile supplied in the project brief. Add exact start and expected graduation dates before publishing.

2025 Bachelor's in Data Science & Information Systems Security
[ADD INSTITUTION]
Coursework from the CV includes data science, AI, database systems, network security, cybersecurity, cryptography, machine learning fundamentals, information systems security, Python, SQL, C, and HTML5.

2024 Undergraduate Diploma in Mathematics & Computer Science (DEUG)
[ADD INSTITUTION]
Coursework included linear algebra, calculus, probability and statistics, discrete mathematics, CMS, database fundamentals, algorithms, and computer systems.

2023 High School Diploma, Mathematical Sciences
Al Massira, Azilal
Mathematics, physics, computer science basics, and statistics.

2022 High School Diploma, Physical Sciences
Al Massira, Azilal
Mathematics, mechanics, electricity, and scientific fundamentals.

TECHNICAL SKILLS

Programming: Python, SQL, C, PHP, HTML5

Data Science: Data cleaning, Feature engineering, Exploratory data analysis, Regression modeling

Machine Learning & AI: Machine learning fundamentals, Artificial intelligence, PyTorch, Deep learning basics, Image classification

Mathematics for ML: Linear algebra, Calculus, Probability, Statistics, Discrete mathematics

Cybersecurity: Information systems security, Network security, Cryptography, Kali Linux, Metasploit, Mitigation thinking

Databases & Information Systems: Database fundamentals, Database storage and retrieval, Information systems, Big data fundamentals

PROJECTS

2025 Car Price Prediction System

Machine-learning regression project for estimating car prices from structured vehicle attributes.

Python, Data cleaning, EDA, Feature engineering, Regression models

2025 Image Classification with PyTorch

Deep-learning image classification project built with PyTorch and labeled image datasets.

Python, PyTorch, Deep learning, Neural networks, Image datasets

2024 Android Device Security Testing

Security-focused learning project studying Android device vulnerabilities and mitigation techniques in an ethical environment.

Kali Linux, Metasploit, Android security, Mitigation analysis

2023 Hotel Management System (PHP)

Database-backed hotel management application built with PHP for rooms, reservations, and user handling.

PHP, Database, HTML5, Information systems

PROJECT EXPERIENCE

2025 - Academic machine-learning project work

Built a car price prediction system using data cleaning, feature engineering, EDA, and regression model evaluation. Built and tested an image-classification model with PyTorch and labeled image datasets.

2024 - Cybersecurity learning project

Studied Android device security testing with Kali Linux and Metasploit and proposed mitigation techniques.

2023 - Web development project

Developed a PHP hotel management system with room management, reservations, user handling, and database persistence.

LANGUAGES

Arabic: Native

English: Intermediate

French: Intermediate

Spanish: Beginner
